

MOUHSINE CHRINBOU

Software Engineer

C/C++ | Python | Embedded Linux | RTOS | Railway | Automotive | Energy

Versailles, France | chrinbou.mouhsine@gmail.com

Professional Summary

Software Engineer with 6+ years of experience developing C/C++ and Python applications for embedded and industrial systems across the Energy, Railway, Automotive and IoT sectors. Experienced in Embedded Linux, REST APIs, AUTOSAR, EN50128, CI/CD and distributed software architectures. Passionate about delivering reliable, maintainable and high-performance software.

Core Skills

C/C++, Python, Embedded Linux, FreeRTOS, STM32, REST APIs, Kafka, Docker, GitLab CI, Jenkins, Conan, CMake, PostgreSQL, SQL, TCP/IP, WebSocket, AUTOSAR, EN50128, Qt/QML, UML, Git, Jira, Confluence.

Software Engineer | ENEDIS

May 2024 - Present

Designed RESTful services and distributed software components in Modern C++.

Implemented REST APIs, Kafka messaging and WebSocket notifications.

Developed SQL persistence, automated workflows and CI/CD pipelines.

Maintained software architecture documentation and testing.

Software Engineer | Hitachi Rail (Segula Technologies)

Jun 2023 - Mar 2024

Developed EN50128-compliant railway signalling software.

Implemented TCP/IP and IPC communications in C/C++.

Performed software validation and unit testing.

Software Engineer | Capgemini Engineering / Dassault Systèmes

Jun 2022 - May 2023

Developed AUTOSAR software components and configured Vector DaVinci.

Built Python/PyQt tools for ADAS simulation analysis.

Software Engineer | M2M Group

Dec 2021 - May 2022

Maintained payment software platform and developed new C/C++ features.

Software Engineer | DIGITORY

Aug 2020 - Oct 2021

Developed STM32 embedded software, FreeRTOS applications and LoRa gateway.

Education

Engineering Degree - Electrical and Embedded Systems Engineering (2017-2020)
Preparatory Classes - Industrial Sciences (2014-2016)
