

MOUHSINE CHRINBOU

Software Engineer

Modern C++ | Embedded Systems | Embedded Linux | Python | Distributed Systems

Versailles, France | chrinbou.mouhsine@gmail.com

Professional Summary

Software Engineer with 6+ years of experience delivering high-quality software for embedded and industrial systems. Experienced across Energy, Railway, Automotive and IoT domains. Strong background in Modern C++, Python, Embedded Linux, REST APIs, distributed systems and CI/CD. Passionate about software architecture, code quality, performance optimization and scalable software design.

Technical Skills

Languages: Modern C++, C, Python, SQL, Bash

Embedded: Embedded Linux, STM32, FreeRTOS

Architecture: OOP, SOLID, REST APIs, UML, Design Patterns, Distributed Systems

DevOps: Git, GitLab CI, Docker, Conan, CMake, Jenkins

Protocols: TCP/IP, WebSocket, Kafka, JSON, XML

Professional Experience

Software Engineer – ENEDIS (2024–Present)

Designed and developed distributed backend services in Modern C++. Implemented REST APIs, Kafka messaging, WebSocket notifications, SQL persistence and CI/CD pipelines using GitLab CI, Conan and CMake.

Software Engineer – Hitachi Rail (2023–2024)

Developed safety-critical railway software compliant with EN50128. Implemented C/C++ communication modules, IPC services, TCP/IP networking and software validation.

Software Engineer – Capgemini Engineering / Dassault Systèmes (2022–2023)

Developed AUTOSAR software components and Python/PyQt engineering tools for ADAS validation.

Software Engineer – M2M Group (2021–2022)

Maintained and enhanced a mission-critical payment platform in C/C++.

Software Engineer – DIGITORY (2020–2021)

Developed embedded firmware for STM32 platforms, FreeRTOS applications and LoRa IoT solutions.

Education

Engineering Degree in Electrical and Embedded Systems Engineering (2020)
