

Mouhsine CHRINBOU

C/C++ & Python Software Engineer

Versailles, France | +33 6 24 55 62 05 | chrinbou.mouhsine@gmail.com

Profile

Software engineer with 5+ years of experience in C/C++ and Python development on Linux and real-time environments.

Strong background in embedded systems, low-level development and high-performance applications, with expertise in memory management, multithreading and performance optimization.

Technical Skills

- C, C++, Python, Qt/QML, Bash
- Linux, Unix, Windows, FreeRTOS
- REST APIs, Kafka, WebSockets
- MySQL, PostgreSQL
- Git, Jenkins, GitLab CI, Docker, Kubernetes, CMake, Conan
- STM32, ESP32, Raspberry Pi

Professional Experience

ENEDIS – C++ / Python Software Engineer (2024 – 2026)

Development of C++ REST APIs, Kafka integration, WebSockets notifications, unit tests and CI/CD pipelines.

SEGULA / HITACHI RAIL – C/C++ Developer (2023 – 2024)

Development of railway signaling software (EN50128), TCP/IP communication modules, UML design and testing.

CAPGEMINI / STELLANTIS – C / Python Developer (2022 – 2023)

AUTOSAR software development, CANoe validation, Python tools for simulation analysis, PyQt GUI.

M2M GROUP – C Developer (2021 – 2022)

Maintenance and development of electronic payment applications, bug fixing and build automation.

DIGITORY – Embedded Software Engineer (2020 – 2021)

STM32 and FreeRTOS development, IoT gateway and industrial embedded systems.

Education

- 2024 – Qt/QML Training – Datascientest
- Engineering Degree – Embedded & Electrical Systems
- Preparatory Classes – Industrial Sciences
